

# Rack IP54 Security Comparison

## Overview

---

This article breaks down the differences between IP54, IP55, IP65, IP66, and IP67, with insights into how each applies to real-world industry use. Rack enclosures are rated based on their suitability for certain applications and the degree to which they protect equipment. We'll delve into what each digit signifies within the IP rating system. IP ratings, short for Ingress. Industrial enclosures exposed to dust, rainwater, or submerged environments risk critical failures – from dust-clogged heat sinks to catastrophic short circuits. How to select the "just-right" protection level?

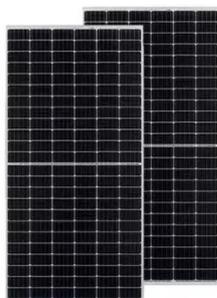

What's the real difference between IP54, IP65, and IP68?

Yonggu Enclosures, a certified. An enclosure rated for either NEMA12 or NEMA4 provides protection against hazardous parts access; ingress of solid foreign objects (dirt, dust, fibers, lint, etc. ); and ingress of water (splashing to hose-down) at different levels.
