

Renewable energy growth guyana

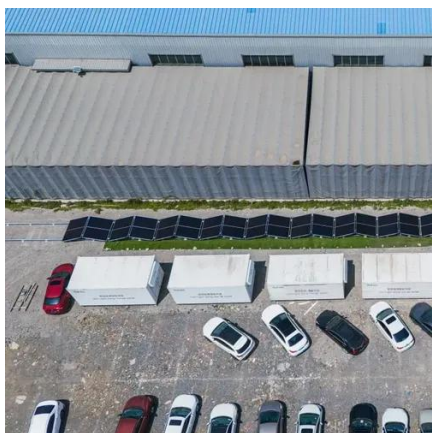

Overview

Using natural gas as a bridge away from heavy fuel oil, followed by the Amaila Falls Hydropower Project and an expansion of solar, wind and biomass, Guyana will see a massive expansion of renewable energy across the country. Guyana has some of the highest electricity rates in the Americas and is about 97% dependent on imported fossil fuels. By 2025, Guyana intends to: Increase its share of renewable energy by 100%. He stated, "We're investing in solar farms, hydro, natural gas, wind, and biomass, all aimed at transitioning. In a landmark move signaling a strong commitment to sustainable development, the Government of Guyana has earmarked GY\$6 billion for national renewable energy initiatives as part of its historic 2026 National Budget.
