

# Saint Lucia Energy Storage Battery Plant

## Overview

---

In a significant move toward energy independence and climate resilience, Saint Lucia is preparing to launch its second industrial-scale solar project—a 10 MW photovoltaic installation paired with a 26 MWh lithium-ion battery energy storage system (BESS). St Lucia Electricity Services (LUCELEC) plans to tender a 10 MW solar plus storage project in St Lucia. While large-scale energy storage battery factories are not yet established locally, the demand for battery storage systems (BESS) is growing in Saint Lucia, a small island nation. As a small island nation, Saint Lucia faces unique energy challenges: high electricity costs, grid instability, and reliance on imported fossil fuels.
