

Simple solar generator production

Overview

How to DIY a Solar Power Generator: In this Instructable, you'll learn how to build your own DIY solar power generator using basic components like a solar panel, battery, inverter, and charge controller. The panel collects sunlight, the charge controller manages the flow of power to the battery, and the inverter turns that stored power into electricity you can actually use. You don't need to be an expert to build one. With a few tools and some basic knowledge, you can create a reliable source of energy. A great thing about solar energy is that it can come in all sizes for all types of applications.
