

Slovakia plug-in electric vehicles phevs

Overview

Though Slovakia still relies heavily on automotive exports, domestic demand for electric vehicles (EVs) lags far behind European averages. The number of battery electric (BEV) and plug-in hybrid (PHEV) vehicles combined only reached a 4.79% share of newly registered cars. Slovakia's automotive sector weathered a turbulent 2024, with vehicle production dipping to 993,000 units, down by almost 87,000 compared to 2023's 1. Analysts expect this revenue to demonstrate an annual growth rate (CAGR 2025-2029) of 21. As a result, the projected market volume for this segment in Slovakia is expected. This report presents a comprehensive overview of the Slovak plug-in hybrid electric vehicles (phevs) market, the effect of recent high-impact world events on it, and a forecast for the market development in the medium term.
