

Small tile installation of photovoltaic panels

Overview

When installing solar panels on tile roofs, protect the delicate tiles and use proper mounting methods to avoid breakage and leaks. With the right equipment, proper planning, and professional installation, your tile roof can easily support a robust solar energy system. So, can you install solar panels on a tile roof?

The short answer is yes—but it requires careful planning and the right installation technique to ensure your roof remains intact and your solar system lasts for decades. The fragile nature of tiles, combined with the need for a secure, long-lasting, and leak-proof installation, requires specialized knowledge and equipment. Avoid comp-outs, as they can harm your roof.
