

# Solar battery cabinet installed indoors

## Overview

---

Solar batteries work best at room temperature, so they should be installed indoors, often in a cupboard under the stairs or a utility room. They can be installed both indoors and outdoors in accordance with AS/NZS 5139:2019, with the garage being the best location. Various solar battery types exist in the market, each having its pros and cons. Knowing the different types helps you decide which one suits your needs best.

**Lead-Acid Batteries** These are the most common type of solar batteries and have been used for decades in off-grid solar systems. They are.

**Indoor vs. Outdoor Placement:** Each option has unique advantages and disadvantages; indoor settings offer protection and stability, while outdoor installations provide space and easier access.

**Battery Types:** Understanding different battery types, such as lithium-ion, lead-acid, and saltwater, is. When choosing where to place solar batteries in your home, consider factors such as local climate, space availability, safety, protection from the elements, and your specific energy needs. No basement or attached garage (We're in Florida).
