

# Solar container outdoor power lights up when plugged in and turns off when unplugged

## Overview

---

Damaged wiring between the solar panel and battery is a frequent cause of solar light failure, requiring inspection and repair. Maybe your lights suddenly stop working. Or they're dim, flickering, or shutting off earlier than expected. 1 FAQ 1: Why Won't My Solar Light Turn On?

2 FAQ 2: Why Are My Solar Lights Dimmer Than Expected?

3 FAQ 3: How Can I Troubleshoot Solar Lights That Turn On and Off. Here, you will learn about 10 quick fixes and one major one that should help your outdoor lights to shine again. Understanding the common problems—and how to address them—can significantly extend the lifespan and reliability. While solar lights are resistant to the ever-changing weather, they can encounter issues or run into some trouble, which is common to many users. But that doesn't mean their functionality is entirely dead.
