## Overview

---

In this article, we will guide you through the process of adding more solar panels to an existing system, addressing common questions and concerns along the way. Sounds weird, right?

But it actually works great. Think of it like this: You buy a bigger water tank than your faucet can drain. If there's enough available installation space, the cost of adding extra panels may be beneficial to maximize. PV oversizing (also known as solar oversizing or overdimensioning) is a proven strategy that can increase solar energy production while dramatically improving return on investment (ROI).
