## Overview

---

Photovoltaic system is mainly divided into five modes: “self-use, surplus power to the Internet”, “self-use, surplus power not to the Internet”, “full grid-connected”, “off-grid” and “parallel / off-grid”. However, different PV system modes are suitable for different application scenarios. Update your eufy app from the App Store (iOS devices running version 11 and later versions) or Google Play (Android devices running version 8. Make sure it has been updated to the latest version. The most common mode for solar power systems is “grid-tied,” which allows for interaction with the local electricity network, enabling users to sell excess energy back to the grid.
