Solar panels have different wattages

Can I Use Solar Panels of Different Wattage?

Solar panels of different watts should not be used together because they have different voltages and amps. The system will always choose the lowest voltage or amp, which will reduce efficiency and power output.

Mixing Different Wattage Solar Panels

The short answer is, yes, you can mix solar panels that have different wattages. But it is not usually advised, because mixing different wattage panels reduces the efficiency and power output.
