

Solar photovoltaic power generation after-sales price

Overview

The weighted average wholesale price for solar PV-generated electricity was \$83 per megawatt-hour (MWh) in 2019, more than double the price paid to producers for electricity generated by wind, fossil fuels, or nuclear. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. This work has grown to include cost models for solar-plus-storage systems. is between \$15,000 and \$25,000 before incentives. Total installed costs for renewable power decreased by more than 10% for all technologies between 2023 and 2024, except for offshore wind, where. In 2019, the average U.S.
