

Solar power for oil drilling

Overview

Solar drilling involves the utilization of solar energy to power drilling rigs and equipment. This technology leverages photovoltaic (PV) panels to convert sunlight into electricity, which is then stored in batteries or used directly to operate drilling machinery. Pictured above is an 800W free-standing solar power system for an oilfield services client. In addition to custom design, we offer a range of standard free-standing kits from 100-1100W. Providing power to these systems requires means of. Just past the intersection of Paso Robles Highway and State Route 33, known locally as “Petroleum Highway,” thousands of oil wells dot the gold fields.

Oil & Gas Remote Power: Harnessing the Benefits of Solar Energy

Solar power plays a crucial role in oil and gas, offering reliable energy for remote drilling and production sites. More importantly, it powers critical applications like SCADA and telemetry, making it both cost-effective and ...

Solar-Powered Oil Drilling?

Both the oil field and the solar farm were developed by the same company: Chevron. The oil giant uses the electricity generated by the solar facility to power the pumps and pipelines at the Lost Hills Oil ...

...

Oil and Gas

Our on-site solar energy kits are capable of providing all necessary power without the need of a grid. Our reliable design means there will be no lapses of power, keeping the pipeline charged and protected.

Solar Power Solutions

We design and engineer custom Solar Power Systems for Oilfield Services, Gas Pipelines, Off-shore Drilling, Injection Sites, Wellhead Locations and Related Oil and Gas Service Companies.
