

Solar power generation fault code 120

Overview

Error 120 indicates a fault current sensor failure within the inverter. This fault typically triggers when the inverter detects an anomaly in the current measurements, which could stem from improper readings due to wiring faults or sensor malfunctions. •How can I troubleshoot isolation test failures?

To troubleshoot, check the. Confirm whether the power setting of the inverter Power Control is limited 4. It's external power meter setting. Follow this path to fix it: Advanced Settings > External EPM Set > Fail Safe Set > Change ON to OFF and then press Enter.
