

# Solar power generation for personal use experience

## Overview

---

Follow along as President Greg Garrison goes solar in this mini-blog series. Over half a year has passed since I embarked on this ambitious journey to build my personal power plant, and the transformation in how I relate to energy has been nothing short of profound. The house had several different ways to produce electricity through alternative energy with the use of solar panels, a wind energy turbine, a battery bank and inverter, and a generator. It had a full range of amenities, including a washer and dryer, refrigerator, stove, satellite TV, propane. There are a number of steps to follow when planning to power your home with solar energy. After choosing which option is best for you to use solar (see step 3), follow the steps afterward that apply to you. By installing solar panels, you can generate your own clean, renewable energy, reducing your reliance on the grid and lowering your electricity bills.

## Solar power generation for personal use experience

### Solar & Battery Solutions , Generac
