## Overview

---

Solar power plants use one of two technologies: • (PV) use, either on or in ground-mounted, converting sunlight directly into electric power. • (CSP) systems use mirrors or lenses to concentrate sunlight to extreme heat to make steam, which drives a to generate electricity.

## Solar power solar power generation panels

### Solar power

Multiple solar cells are connected inside panels. Panels are wired together to form arrays, then tied to an inverter, which produces power at the desired voltage, and for AC, the desired frequency/phase.
