## Overview

---

This framework provides relevant background information for State Energy Offices and PUC consideration, regardless of their state's microgrid landscape, through examples from peers as states across the country have implemented varying strategies to enable microgrids. As a result, the National Association of State Energy Officials. Hidden within the \$1.2 trillion Infrastructure Investment and Jobs Act (IIJA), signed into law in November 2021, is a \$1 billion allocation for the Energy Improvements in Rural or Remote Areas (ERA) program. Created by the Department of Energy's (DOE's) Office of Clean Energy Demonstrations (OCED). This coalition of rural electric cooperatives seeks to develop resilient, reliable and economically beneficial microgrid and storage projects for their communities. Billions of dollars from the bipartisan infrastructure law have been allocated to improve electric grid resilience in rural areas and. Authorized by Section 40101(d) of the Bipartisan Infrastructure Law (BIL), the Grid Resilience State and Tribal Formula Grants program is designed to strengthen and modernize America's power grid against wildfires, extreme weather, and other natural disasters that are exacerbated by the climate. The electric grid is considered especially important because power is required to maintain the functionality of most critical infrastructure sectors—those deemed vital to the economy, public health and safety. The threat from natural disasters has grown in intensity and frequency. Our researchers evaluate in-house-developed controls and partner-developed microgrid components using software modeling and hardware-in-the-loop evaluation platforms.

This paper serves as a link between scientific advancements and field-proven best-practices for designing microgrids in rural communities.

### Renewable Energy Microgrids: Latest Trends for US Rural Communities

The latest trends in renewable energy microgrids for rural communities in the US include advancements in battery storage, smart grid technologies, and a focus on community-owned projects ...

## Microgrid Consortium

What Are Microgrids?The Consortium Supports Co-Ops as TheyNRECA Coverage: Co-Ops Are Leaders in Microgrid ProjectsA microgrid is a power system that is detached from the main electric grid either full time or for a specific event, like a power outage. It has a source of generation, a means of distribution, and a platform that manages generation to effectively meet the demand for electricity and keep the system stable.
