

Stockholm environmentally friendly energy storage power supply service

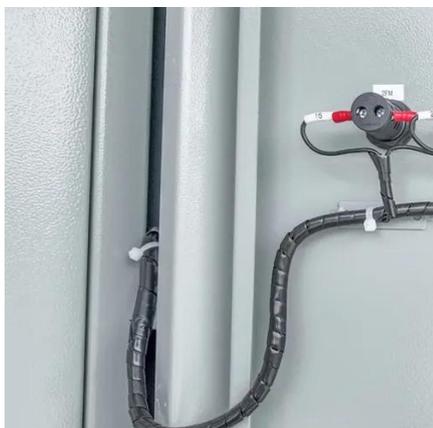

Overview

This project aims to reduce emissions, improve energy efficiency and increase the port capacity to meet growing energy demands. Ports of Stockholm and its partners are now launching an innovative project that combines onshore power supply (OPS). Sweden has been a global leader in environmental sustainability, consistently ranking among the top countries for renewable energy adoption, climate action, and low-carbon policies. In 2025, the Stockholm region exemplifies the nation's ambitious green transition. Comprehensive renewable energy systems designed for Swedish homes and businesses High-efficiency. Epishine manufactures low-power printed solar cells for sensors, electronic price tags, locks and other electronics. These solar cells require no sunlight to operate, meaning they can be used with standard room lighting, such as ambient and artificial light from lamps and other sources.
