

The banker behind the photovoltaic panels

Overview

Solar panel manufacturer Qcells operates a residential solar financing platform called EnFin. The company recently completed its asset-backed securities transaction totaling \$324. Residential solar is a small and rapidly expanding sector, with homeowners increasingly seeking cleaner energy sources and the ability to manage electric costs. Residential solar is also in a sweet spot of sorts—offering generally high-performing solar systems with low environmental, social and. The market for residential solar panels continues to grow, in large part due to declining solar panel costs and increased government incentives, including tax credits. With that growth, the marketing and door-to-door sales of solar-related financial products have become more prevalent. This Issue. Over 2. The deal included a \$50 million equity investment from ARC Financial Corp and other existing co-investors. Switching over to solar energy can be expensive, but there are many ways to pay for the purchase and installation of panels.
