

The latest update on vilnius energy storage implementation plan

Overview

Lithuania is moving forward with one of the largest energy storage expansions in Europe, announcing plans to install 1.7 GW of capacity equal to 4 GWh of storage. The Baltic country aimed to procure at least 800 MWh of energy storage but ultimately approved support for five times that capacity. The Ministry of Energy announced on. The Government of the Republic of Lithuania has appointed Energy cells as the operator of storage facilities that will provide Lithuania with an instantaneous electricity reserve. Energy cells signed a contract with the winning consortium of Siemens Energy and Fluence.
