Overview

A rooftop solar power system, or rooftop PV system, is a photovoltaic (PV) system that has its electricity -generating solar panels mounted on the rooftop of a residential or commercial building or structure. [1] . Technology Advances Are Maximizing Performance: Modern solar panels achieve 18-22% efficiency with premium models reaching 24%, while micro-inverters and power optimizers ensure optimal performance even in partially shaded conditions. Smart monitoring systems provide real-time performance tracking. Install Solar Roof and power your home with a fully integrated solar and energy storage system.
