

The solar panel is cracked inside

Overview

Two common DIY methods for repairing cracked solar panels are covering the panel with a laminating film and applying polyurethane. The laminating film method involves spreading a transparent, waterproof film over the cracked panel and using a heat gun to fuse it to the surface. Most people aren't sure how to respond whenever they discover a broken solar panel. Your power inverter may also produce an error message if it's designed to do so. While severe impacts from falling branches or large hail can certainly cause significant damage, smaller cracks are often the bigger concern.
