

# The world s largest solar system

## The world s largest solar system

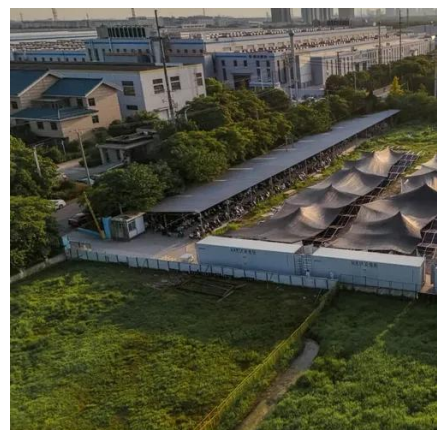

### Size of Planets in Order

Get the size of planets of the solar system in order from smallest to largest in kilometers, miles, and relative to Earth.

### How big is the Solar System?

The scale of our Solar System is gigantic. There's more to our cosmic neighbourhood than eight planets and an asteroid belt.

### Largest in the Solar System

Well, there's only one star in the Solar System: the Sun, so it's the automatic winner here. The Sun measures 1.4 million km across.

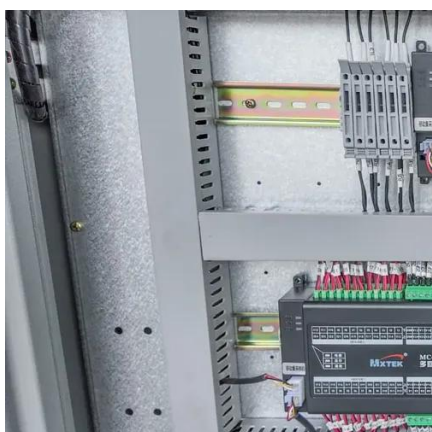

### [Astronomers find the largest solar system in the galaxy](#)

Incredibly the object, designated as 2MASS J2126, is about 1 trillion (1 million million) kilometers from the star, or about 7000 times the distance from the Earth to the sun. The researchers ...

### NASA's Juno finds Jupiter is a tiny bit smaller than previously thought

Jupiter, without a doubt, is the biggest planet in our solar system. But it turns out that it is not quite as large - by ever so small an amount - as scientists had previously thought.

### [Astronomers discover largest solar system](#)

Astronomers have discovered the largest known solar system, consisting of a large planet that takes nearly a million years to orbit its star.

### Sweden Solar System

The Sweden Solar System is the world's largest permanent scale model of the Solar System. The Sun is represented by Avicii Arena in Stockholm (still known by most as Globen), the largest hemispherical ...

### [List of Solar System objects by size](#)

Solar system planets, major moons, and 3 stars of different sizes are shown comparatively in three levels of zoom: one for the rocky planets, one for the gas giants, and one for the stars.

## Largest object in the Solar System

The largest object in the solar system is the Sun (also known as Sol), which has a mass of  $1.988 \times 10^{30}$  kg ( $2.191 \times 10^{27}$  US tons) and a diameter of 1,391,016 km (864,337 mi). The solar system formed ...
