

Toronto canada adjusts new energy storage project library

Overview

The East of GTA Energy Storage Project is a large-scale battery energy storage project located east of the greater Toronto area and is planned to be 325 MW in size. EDWARDSBURGH CARDINAL — Construction is now underway on the single largest battery storage facility ever procured in Canadian history, supporting the Ontario government's plan to deliver reliable, affordable and clean energy to power the province's growing economy and communities. Once complete, the installed capacity of energy storage larger than 1 MW—and connected to the grid—in Canada may increase from 552 MW at the end of 2024 to 1,149 MW in 2030, based solely on 12 projects currently under construction 1. Since entering the. Select “Accept all” to agree to our use of cookies and similar technologies to enhance your browsing experience, security, analytics and customization. Select “Manage cookies” to make more choices or opt out. The initiative aims to support electricity reliability as more solar power.
