

Transnistria climate change

Overview

Transnistria, a breakaway region from Moldova, faces significant risks from future climate change. Rising temperatures can lead to frequent heatwaves, affecting agriculture and human health. Moldova wants to introduce its own carbon tax to keep pace with the European Union's climate legislation — but the effort is creating tensions with its Russian-backed breakaway region. Climate change is reshaping the world, and the tiny, unrecognized breakaway region of Transnistria in Europe is not an exception. Situated between. As the temperature in Moldova dips below freezing, the breakaway Transnistria region's 360,000 residents are using plug-in electric heaters and wood stoves to keep warm. In the two weeks since Russian gas stopped flowing to the Moscow-backed region via Ukraine, locals have faced gas, electricity. As temperatures dropped across the left bank of the Dniester River in Moldova, thousands of people found themselves caught in a crisis they had long feared but never fully prepared for. Hundreds of thousands of people in Transnistria now face a harsh winter.
