

Transportation requirements for energy storage lithium batteries

Overview

This document provides generalized guidance on the requirements for proper packaging and hazard communication of shipments of lithium cells and batteries and lithium battery-powered equipment by all modes of transportation. Each distinct shipping guide in this document refers to the regulatory requirements for a specific lithium. □ This document is based on the provisions set out in the 2025-2026 Edition of the ICAO Technical Instructions for the Safe Transport of Dangerous Goods by Air (Technical Instructions) and the 66th Edition (2025) of the IATA Dangerous Goods Regulations (DGR). The provisions of the DGR with respect. Recent updates from the U. Department of Transportation (DOT), PHMSA, ICAO, and IATA have redefined how overpack labels, CAUTION markings, and battery packaging must be applied in 2025. It includes direct links to relevant sections of official DOT documentation to make locating specific rules easier. 3 testing (8 rigorous stress tests) to be legally shipped globally, regardless.
