

Turn off photovoltaic panels when not in use

Overview

It is generally not necessary to turn off your solar panels when they are not in use. Solar panels are designed to be constantly exposed to the sun during daylight hours and do not require manual activation or deactivation. Otherwise you need to disconnect the cables, but be careful not to short circuit your panels. Is there an emergency shut-off?

Can you. Solar panels are known for being low-maintenance and long-lasting—but what happens when they're not in regular use?

Whether you've paused your system temporarily or moved into a home with inactive panels, you might wonder: Can a solar panel degrade even if it's just sitting there?

Let's break down. Protect your solar panels when not in use to ensure longevity and efficiency. Here's a general guide on how to safely turn.

Turn off photovoltaic panels when not in use

Can I Switch Off My Solar Panel If I Don't Need the Power It Generates?
