

Uzbekistan Microinverter solar Power Generation

Overview

Uzbekistan currently operates 11 solar photovoltaic plants and 4 wind farms with a combined installed capacity of 4,119 megawatts. These facilities were responsible for the record-breaking output, with solar plants contributing 760.9 million kWh and wind farms producing. Uzbekistan is beginning a rapid scale-up of renewable power, and large solar projects are essential for meeting its target to increase the share of renewables to 40% of total electricity generation by 2030. This is a strikingly ambitious objective given today's starting point: in 2023, around 90%.

The World Bank Implementation Status & Results Report Uzbekistan Scaling Solar 2 Independent Power Producer (P174322) Public Disclosure Authorized The World Bank Implementation Status & Results Report Uzbekistan Scaling Solar 2 Independent Power Producer (P174322) Jun 30, 2025 Page 1 of 7 For. Uzbekistan increased electricity production from renewable energy sources in 2025, with solar and wind generation more than doubling, as per to data released by the Ministry of Energy. By the end of 2025, total electricity production in the country rose by 6. According to the press service of the Ministry of Energy, the new record was reached on December 8 at 17:00 Tashkent time. This figure represents 17 per cent of total. Tashkent, Uzbekistan, May 21, 2024 — The World Bank Group, Abu Dhabi Future Energy Company PJSC (Masdar), and the Government of Uzbekistan have signed a financial package to fund a 250-megawatt (MW) solar photovoltaic plant with a 63-MW battery energy storage system (BESS).

[Uzbekistan doubles solar and wind power generation in 2025](#)

Uzbekistan increased electricity production from renewable energy sources in 2025, with solar and wind generation more than doubling, as per to data released by the Ministry of Energy.

Solar and wind power generation in Uzbekistan increased by 2.1 times

The increase in renewable energy production reduces the load on gas generation and increases the stability of Uzbekistan's energy system. The doubling of solar and wind generation ...

Case 1. Uzbekistan 1-GW Solar PV Project - China's Official Energy

Led by Energy China, this project is one of the country's first large-scale solar projects and plays a meaningful role in bridging the investment gap. Once fully operational, the two sites will generate an ...

Uzbekistan to Build New Solar Plant and First Battery Energy Storage

The solar power plant, which will be constructed in the Alat district of the Bukhara region, is projected to cut over 327,000 metric tons of CO2 emissions annually by generating more than 585 ...

Uzbekistan Hits Historic High in Solar and Wind Power Generation

Uzbekistan reached a new milestone in its renewable energy transition as the country's solar and wind power plants generated 1.246 billion kilowatt-hours (kWh) of electricity in July 2025, ...

[Uzbekistan's green power generation hits](#)

[new record](#)

At present, the country operates solar and wind power plants with a combined installed capacity of 5,582 MW. Over the past 1.5 months alone, this capacity has increased by 900 MW ...

[The World Bank Implementation Status & Results Report ...](#)

The two solar PV plants have a combined installed capacity of 440 MW, generating over 1 TWh of electricity annually - sufficient to power over 100,000 households.

Uzbekistan's Solar and Wind Power Plants Generate 9 Billion kWh in ...

Uzbekistan has produced 9 billion kWh of electricity from its solar and wind power plants since the beginning of 2025, according to the Ministry of Energy. Over the past four weeks, ...
