

Vienna solar container communication station Power Supply Plant

Overview

Looking out the window between the stations Praterstern and Traisenstraße, passengers travelling by train through Vienna can catch a glimpse of the first photovoltaic system on the roof of a temporary construction site office in the Austrian capital. The citizens' power plants project launched by Vienna's municipal energy provider Wien Energie allows everyone to participate in the development of eco-friendly electricity generated by solar photovoltaic panels. Ideal sites should be close to energy consumption. On one of our construction sites at Vienna's Nordbahnhof, we recently launched a pilot project to supply the construction site cabins with green energy through a photovoltaic system - with encouraging results!

Looking out the window between the stations Praterstern and Traisenstraße, passengers. The wind-solar-diesel hybrid power supply system of the communication base station is composed of a wind turbine, a solar cell module, an integrated controller for hybrid. The spread use of both solar and wind energy could engender a complementarity behavior reducing their inherent and variable. What started as an alternative green investment idea in the aftermath of the Fukushima catastrophe became only a year later reality and one of Viennas most prominent innovations and best practices for combining citizen involvement with clean energy strategy and the significant increase of solar.
