

What do you need to make a power storage device

Overview

Let's look at what you need and how to do it! You will need some basic tools and supplies. A battery pack (like LiFePO4 or lead-acid). A DC-to-DC converter for USB or other DC. Portable power stations are handy for camping trips, emergencies, or off-grid projects. However, store-bought models can cost \$500 to \$3,000+ and more. But what if you could build one yourself?

Today, we'll show you how to DIY a portable power station. Options include a lead-acid battery bank, a DIY lithium-ion pack, a saltwater battery solution, a nickel-iron setup, and a repurposed EV battery array.
