

What is the principle of the variable pitch battery cabinet

Voltage range:691.2-947.2V

>6000 cycles(100%DOD)

Rated battery capacity:
216KWH (customizable)

EMS communication:
4G/CAN/RS485

Overview

The cabinets containing the batteries are moved by motorized lift trucks or transpallets, taking care to superimpose wooden or iron strips perpendicularly to the blades, so that the lifting effort is exerted on the entire support of the cabinet. The invention relates to the technical field of battery module assembly, in particular to an automatic assembly system for a variable-pitch battery module. The automatic feeding and discharging mechanism comprises an inclined rail feeding mechanism, a material taking mechanism, a deformation. Handles - provides an easy way to handle the battery cabinet. Check for volta with both AC and DC voltmeters prior to making co insula d tools appropriately rated fo age is not hazardously high, the battery can deliver large amounts of current. Exercise extreme caution not to. The cabinets covered by the technical specification have been designed to contain the hermetic lead-acid electric accumulator batteries. The construction characteristics of the recombination type lead-acid electric accumulators (valve-regulated hermetic accumulators); the absence of acid fumes and. The invention provides a cell feeding gripper with a variable pitch function and a use method thereof, belonging to the field of automatic assembly production of power battery soft package modules, the cell feeding gripper with the variable pitch function comprises a gripper base plate which is.
