

What is the set of photovoltaic panels installed on the roof

Overview

A rooftop solar system is an array of solar panels installed on a roof, each containing several solar cells that absorb sunlight and create an electric field across each panel. Solar, or photovoltaic (PV) panels as they're referred to in NFPA 1, Fire Code, are becoming more and more common on one- and two-family dwelling and townhouse roofs. Since the 2016 edition of NFPA 1, access pathways have been required on roofs to facilitate fire service access as well as egress. As a homeowner, do you intend to install solar panels on your roof?

This is the appropriate spot for you if that's the case.
