

# What kind of panels are suitable for photovoltaic roofs

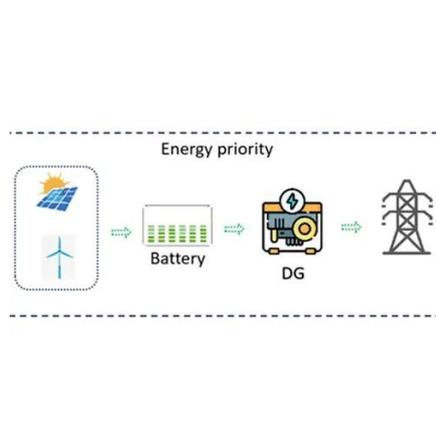

## Overview

---

Flat roofs – great for urban or commercial properties; panels can be angled with brackets for maximum sunlight. Metal standing seam roofs – among the easiest to install on, requiring no roof penetration. Because composite shingles are so common, this roof type offers the widest range of options for. Most roofs can support solar panels, but some materials and designs make installation smoother, safer, and more cost-effective. Solar panel systems last for 25 years or more, therefore your roof must be strong enough to handle it at least for that time period. Installation of a solar. What is the best roofing.
