

Zhenghao Power Solar power generation is too expensive

Overview

In 2023, the global weighted average levelised cost of electricity (LCOE) from newly commissioned utility-scale solar photovoltaic (PV), onshore wind, offshore wind and hydropower fell. This data is expressed in US dollars per kilowatt-hour. It is adjusted for inflation but does not account for differences in living costs between countries. Data source: IRENA (2025); IRENA (2024) – Learn more. While ordinary PV modules still dominate 68% of the residential market, Zhenghao's N-type TOPCon cells are reportedly achieving 24. Wait, no – let me clarify: that lower temperature coefficient means.
